

HENRY UWAEZUOKE

Aspiring SOC Analyst | Penetration Tester | IT & Cybersecurity Technician

Lagos, Nigeria | henryuwaezuoke@gmail.com | +234 803 867 6335
linkedin.com/in/henry-uwaezuoke-34681b411 | bihghefty.github.io/cyberportfolio

CAREER OBJECTIVE

Cybersecurity professional transitioning from a strong IT hardware support background into security operations and penetration testing. Hands-on experience building home lab environments for SIEM monitoring, Active Directory hardening, and phishing simulation/security awareness testing. Seeking an entry-level SOC Analyst or Penetration Testing role to apply practical, self-taught skills within a professional security team.

TECHNICAL SKILLS

- SOC Analysis & Threat Detection
- Network Security & Troubleshooting
- Active Directory Security (GPO Hardening)
- SIEM Administration (Wazuh)
- Penetration Testing Fundamentals
- Security Awareness & Phishing Simulation
- MITRE ATT&CK Framework
- Linux (Kali) & Windows Server Administration

HANDS-ON PROJECTS (full write-ups: bihghefty.github.io/cyberportfolio)

- **Phishing Simulation Lab** — Built and deployed a cloned login page, credential harvester, and real-time admin dashboard to simulate phishing attacks and measure click/capture rates.
- **SIEM Home Lab (Wazuh)** — Deployed a multi-VM lab integrating Wazuh SIEM with MITRE ATT&CK mapping, detecting live attack simulations including brute force and persistence techniques.
- **Active Directory Security Lab** — Configured a Windows Server 2019 Domain Controller with GPO-based restrictions across USB, Registry Editor, Control Panel, and Task Manager.

PROFESSIONAL EXPERIENCE

IT & Hardware Support Technician (Freelance)

Lagos, Nigeria | 2018 – Present

- Diagnosed and repaired laptop hardware faults, including component-level troubleshooting and upgrades (RAM, storage)
- Installed and configured operating systems, software, and security patches across client devices
- Provided ongoing technical support and maintenance for individual and small business clients

EDUCATION

B.Sc. Computer Science

College of Education, Anambra State | 2014 – 2019

TRAINING & CONTINUOUS LEARNING

- TryHackMe — ongoing rooms in SOC analysis, penetration testing, hash cracking, and network scanning
- Self-directed home lab build-outs (VMware Workstation): Wazuh SIEM, Windows Server 2019 AD, Windows 10 client
- Independent research: authored a formatted technical case study on the Stuxnet malware
